

# Delaware Energy Services Successfully Completes Moomaw SWD Number One Ahead of Schedule

**For Immediate Release**

**Release No. 18-12-11  
December 11, 2018**

Delaware Energy Services (DES) and the DES Drilling Team have successfully drilled and completed the Moomaw SWD #1, a Devonian disposal well in Lea County New Mexico.

**Delaware's Vice President of Drilling Jason Goss commented,** "We are excited to announce the successful drilling and completion of the Moomaw SWD #1 in Lea County NM. Our team completed the nearly 20,000 ft. MD/TVD well in an impressive 58 days spud to TD in a challenging drilling environment. The rapid execution will allow DES to provide produced water management for our customers ahead of schedule in the deepest portion of the Northern Delaware Basin."

In the continued effort to support oil and gas customers in the Delaware Basin, DES is working diligently to build out its produced water infrastructure. This includes drilling additional disposal wells, expanding the gathering system and advancing water reuse/recycling.

**End**

## **About Delaware Energy Services**

Delaware Energy Services is an affiliate of Delmar Systems Inc., a worldwide oil and gas service company established in 1968. DES provides operators and water haulers with reliable, cost-effective solutions for produced water gathering, reuse and disposal. Serving customers throughout Southeastern New Mexico, DES is focused on superior customer service, safety and environmental responsibility. Delaware Energy is committed to always delivering high quality services while meeting the unique needs of our customers.
